

Futronic MKII Optional Accessories

Pilot Plug Cable

This cable is used with the testing of pilot plugs onboard ships. The cable is equipped with a DIN-type plug for connecting to the test box and a socket which fits the vessel's pilot plug.

Set of Attenuators

Attenuators are used e.g. with AIS tests and VHF sensitivity tests. The set includes 1x10 dB, 1x20 dB and 1x40 dB attenuators, 2 Watt, with BNC.

RF Amplifier

If the test box signal is not strong enough when testing NAVTEX receivers and MF radios over the air, adding this RF amplifier will increase the output level by 15-20 dB.

Watertight and Crush Proof Case

This case is specially configured to hold the tester and accessories safe and secure. Weight only 3.9 kgs. External dimensions: 460 x 360 x 175 mm.

**Futronic Testers
