

Installation guide for Testbox.exe

PC software for the FUTRONIC Test box MKII

Testbox.exe supports Windows XP, Vista, 7, 8 and 10.

Installation

- 1) Run Setup_FUTRONIC.exe and follow the instructions.
- 2) Connect the FUTRONIC Test box to the USB port and turn power on.

Windows will install the USB FT232 driver automatically, if required.

- 3) Run the Testbox.exe program and it will automatically connect to the test box.

If this error message is displayed with Windows XP, then Microsoft .NET Framework 3.5 has to be installed. Run the attached file dotnetfx35setup.exe.
